### **FUN FACTS ABOUT THE EMPEROR PENGUIN:**

- They are the largest of all living penguin species and breed annually during the Antarctic winter, June through August. During this time, temperatures can drop as low as -76F with winds as high as 124 mph.
- They can dive to a depth of 1,800 feet and hold their breath for up to 22 minutes! Their aerodynamic bodies and strong flippers make them excellent swimmers, reaching speeds of 7.6 mph.
- Colonies of adults and chicks work together to huddle for warmth. 5,000 or more tightly packed adults and chicks shuffle around, so each takes a turn on the outside of the huddle where it's cold.
